Description

Description for Nagkeshar, Mesua Ferrea

A handsome Indian evergreen tree often planted as an ornamental for its fragrant white flowers that yield a perfume; source of very heavy hardwood used for railroad ties. In olden time, the very hard timber was used for making lances. It is a small to medium-sized evergreen tree up to 13 m tall, often buttressed at the base with a trunk up to 90 cm in diameter.

Common name Cobra saffron, Ceylon ironwood, Indian rose chestnut	Flower colours White	Bloom time Summer	Height 30m	Difficulty Easy to grow
---	-------------------------	----------------------	---------------	----------------------------

Planting and care

An accurate soil test will tell you where your pH currently stands. Acidic (sour) soil is counteracted by applying finely ground limestone, and alkaline (sweet) soil is treated with ground sulfur. If you order roses from a mail-order company, order early, in January or February (March at the latest). They are usually shipped in the spring as bare roots when plants are fully dormant, well before they have leafed out

Sunlight Full Sun	Soil Well-drained soil	Water Medium	Temperature -1 degrees c	Fertilizer Apply any organic fertilizer

Caring for Nagkeshar

Start with pruning shears for smaller growth. Use loppers, which look like giant, long-handle shears, for growth that is more than half an inch thick. A small pruning saw is handy, as it cuts on both the push and the pull.

Typical uses of Nagkeshar

Special features: It has simple, narrow, oblong, dark green leaves 7-15 cm long, with a whitish underside; the emerging young leaves are red to yellowish pink and drooping.

Culinary use: na

Ornamental use: The plant is used for ornamental purpose.

Medicinal use: Unverified information The leaves are applied to the head in the form of a poultice for severe colds. Oil from the seeds is used for sores, scabies, wounds, and rheumatism. The root of this herb is often used as an antidote for snake poison. The dried flowers are used for bleeding hemorrhoids and dysentery with mucus.

Fresh flowers are also prescribed for excessive thirst, excessive perspiration, cough, and for indigestion. Medicinal uses: Warning: Unverified information The leaves are applied to the head in the form of a poultice for severe colds. Oil from the seeds is used for sores, scabies, wounds, and rheumatism. The root of this herb is often used as an antidote for snake poison. The dried flowers are used for bleeding hemorrhoids and dysentery with mucus.
