Planting & Care

This page pulls together many posts from this blog as a convenient way to cover the basics of moss gardening. To gain a deeper understanding you can filter the blog post by choosing the category of Moss Education which will contain the information below but also include all of the posts that focus on cultivation techniques.

Sunlight: Full Sun

Soil: well-drained soil

Water: medium

Temprature: 10°C (55°F)

Fertilizer: Apply any organic fertilizer

Care:

- Mosses are not particular about the type of soil they grow on in terms of soil composition.
- Loam, clay or richly amended soils will all work fine.
- The exception would be soils with a high sand content preventing a stable surface; ever-shifting loose sandy soils make attachment

difficult, but not impossible.

-

Use

Medicinal use:

- A decoction of the root bark has been used as a diuretic.
- .
- .
- .
- Flowers and buds chewed by the mother and given to infants for general body ricin, one of the most poisonous naturally occurring chemicals known to Man; .
- .
- .
- The leaves are harvested as the plant comes into flower and are dried for later use.

Culinary use:

- leaves

Ornamental use:

- The plant is used for ornamental purpose

Note:

for medicinal use, please consult appropriate doctor before use.
