Description

Description for Petunia Ultra Star

The popular flower of the same name derived its epithet from the French, which took the word petun, meaning tobacco, from a Tupiã€“Guarani language.

An annual, most of the varieties seen in gardens are hybrids. Petunias are one of the most popular bedding flowers.

| | | | | |
|-------------|--|----------------------|--------|--------------|
| Common name | Flower colours | Bloom time | Height | Difficulty |
| - | The plant carry red,pink,yellow,purple and white | Spring, Summer, Fall | 4 inch | Easy to grow |

Planting and care

Petunias do best in full sun, but can handle partial shade, especially in hotter areas.

| | | | | |
|--------------------------------|---|----------------------|---|--|
| Sunlight | Soil | Water | Temperature | Fertilizer |
| Most varieties prefer full sun | They need well-draining, slightly moist soil. | Water them regularly | The warm area and let them grow on in cooler temperatures | Fertilize your plants monthly to ensure good growth. Double-flowered cultivars like a biweekly dose of fertilizer. |

Caring for Petunia Ultra Star

Petunias grow best in full sun, although they will tolerate dappled shade, especially in hot conditions. They need well-draining, slightly moist soil. In soggy soils, they become leggy. Regular deadheading also improves their appearance. An early and midsummer application of high-phosphorus fertilizer improves both blooms and vigor.

Typical uses of Petunia Ultra Star

Special features: Attracts Birds, Fragrance, Good for Containers, Low Maintenance

Ornamental use: It is generally kept indoor and in terrace area
