Description

Description for Snake Gourd Chichinda

Snake Gourd grows well in Tropical countries.

Snake gourd fruits are white or greenish white in colour and long round having 65 to 75 cms diameter and 100 to 150 cms long.

Some short varieties are also being grown which will be having 50 cms diameter and 15 to 20 cms in length.

Common name	Flower colours	Bloom time	Height	Difficulty
Snake gourd, Padwal, Pudalagai Kootu	White	Summer, Rainy season, Winter	Up to 30 ft	Easy to grow

Planting and care

At the time of bed preparation, FYM should be mixed with soil for good yield.

Seeds are sown directly on the bed or pot. They should be planted 2 cm deep in the bed or pots.

Plastic wrap can be used for mulching purpose to control the weed and water loss. They should be planted 2 cm deep in pots

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun	Well-drained loamy soil with 6 to 7.5 pH level	Moderately	25 to 30 degree C	Use any organic fertilizer.

Caring for Snake Gourd Chichinda

- Water should be done before soil feels dry.

- Snake gourd can also be grown in containers around 5-gallon size.
- Containers must have good drainage and cant be moved once the vines attach tendrils to other objects.
- Snake gourd cant survives in frost condition.

Harvesting

Summer, Rainy season, Winter
