Description Tolerant of pruning and shearing. Little Gem is noted for requiring little pruning. Avoid cultivating around plants because they have shallow roots. Roots appreciate a good mulch (1-2 ").

**Common name:** araticum-grande , araticum-manso , cachiman épineux

**Color:** green

**Bloom time:** April

**Height:** 1.50 to 2.00 feet

**Difficulty level:** easy to grow

**Planting & Care**

Plants do not thrive in Zones 9 to 10 without a period of refrigeration; they need a cold, dormant period. Select a site with soil that drains well. How can you tell? After a good rain, find a spot that is the first to dry out. Water trapped beneath the scales may rot the bulb, so a well-drained site is essential.

**Sunlight:** Full sun to part shade

**Soil:** well-drained soil

**Water:** Medium

**Temperature:** 36.0-38.0 °C

**Fertilizer:** Apply any organic fertilizer

**Care:**

- Give them plenty of organic matter when planting and don't crowd them.
- Wear sturdy gloves to protect your hands from prickly thorns.
- Have a hose or bucket of water and all your planting tools nearby.
- Keep your bare-root rose in water until you are ready to place it in the ground.

**Harvesting:** 2 weeks

**Care:**

- plant care may require a bit of effort, but the results are well worth the work.
- Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance.
- Common is a vine and has larger glossy green leaves than Royal.
- Both can survive in temperate climates if they are planted in a sheltered area.
- 

**Special Feature:**

Shrub borders. Incorporate into a foundation planting.  
Use

**Note:**

for medicinal use

**Reviews**

Wednesday, 23 August 2017

Very fast germination just on the third day from seeding. Happy with that but has to update the review later based on the yield. If it gives yield just as shown in the picture it will be excellent. Le
