

Opuntia Microdasys, Bunny Ear Cactus - Plant

Opuntia micro dasys has no spines, but instead, has numerous white or yellow glochids long in dense clusters; these glochids are barbed and thinner than the finest human hairs, detaching in large numbers upon the slightest touch

Description

Description for Opuntia Microdasys, Bunny Ear Cactus

Opuntia microdasys is a species of cactus native and endemic to central and northern Mexico.

Common name	Flower colours	Bloom time	Height	Difficulty
Angels Wings, Bunny-Ear Prickly Pear, polka-dot cactus	Greenish-white	Rarely flowers	1 to 2.5 feet	Easy to grow

Planting and care

The vining varieties require a support structure as some can get 15 feet tall. All plants prefer sun to light shade sites with well-draining and moderately fertile soil. Install the plant in the ground at the same level it was growing in the nursery pot. Most plants are grafted onto the common rootstock because of its superior hardiness.

Sunlight	Soil	Water	Temperature	Fertilizer
Part shade to full shade	Well-drained soil	Medium	45 degrees C	Apply any organic fertilizer

Caring for Opuntia Microdasys

Deadhead religiously and keep beds clean. Every leaf has a growth bud, so removing old flower blossoms encourages the plant to make more flowers instead of using the energy to make seeds. Clean away from around the base of the rosebushes any trimmed debris that can harbor disease and insects.

Typical uses of Opuntia Microdasys

Special features: Lends bright colors and a tropical look to beds, borders, and containers. Houseplant.

Ornamental use: The plant is used for ornamental purpose.
