Description

These are top 3 basic [organic fertilizers](#)

1. Neem Cake :

The [Neem Cake](#) is used as good organic manure in agriculture and also protects from fungus and pests.

The High Azadirachtin content in [Neem cake](#) helps in protecting the crops against parasitic nematodes and as best soil conditioner.

2. Vermicompost :

[Vermicompost](#) is the final product of composting organic material using different types of worms, such as red wigglers (Eisenia Fetida) or earthworms, to create a homogenized blend of decomposed vegetable and food waste, bedding materials and manure.

[Vermicompost](#), similarly known as worm castings or worm manure, is used to loose the soil and can be used as a high grade natural, organic fertilizer.

3. Stear Meal :

[Stear Meal](#) is used as good organic manure in plants. It increases calcium in the soil, helps growth of fruits, branches and flowers as well acts as pest repellent.
