Description Winter hardy to USDA Zones 10-12 where it grows in average, medium moisture, well-drained soils in full sun to part shade. It likes warm, humid conditions.

Common name: Pandanus tectorius Veitchii

Color: White bracts (male) greenish (female)

Bloom time: Seasonal bloomer

Height: 15.00 to 20.00 feet

Difficulty level: easy to grow

Planting & Care

Garden sites that receive full, all-day sun to partial afternoon shade make the best planting spots for pandans. Moist soil that retains moisture without becoming soggy results in the healthiest growth, although a pandan can tolerate some drought stress once it s established.

Sunlight: Full Sun to Partial Shade

Soil: well-drained soil

Water: Medium

Temprature: 50°F

Fertilizer: Apply any organic fertilizer

Care:

- Water garden plants once a week when there is no appreciable rainfall, supplying 1 to 3 inches of water weekly or enough to keep the soil moist.
- Indoor plants need watering when the top 1 inch of soil begins to dry.

Special Feature:

Interesting fruit tree or ornamental for tropical to subtropical areas. Container plant for cooler climates.

Use

Medicinal use:

- Hawaii i, the juice from the aerial roots tips (ule hala) was used as a tonic and to treat scrofula

Ornamental use:

- The plant is used for ornamental purpose.

Note:

No serious insect or disease problems
