Parijat, Parijatak, Harshringar Plant

Description for Parijat, Parijatak, Harshringar

Plant height: 15 - 23 inches

Plant spread: 4 - 8 inches

Nyctanthes arbor-tristis is a species of Nyctanthes, native to South Asia and Southeast Asia. Nyctanthes arbor-tristis is a shrub or a small tree growing to 10 m tall, with flaky grey bark.

Common name(s): -

Flower colours: White

Bloom time: Seasonal bloomer

Max reachable height: 8 to 12 feet

Difficulty to grow: Easy to grow

Planting and care

plant care may require a bit of effort, but the results are well worth the work. Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance. Common is a vine and has larger glossy green leaves than Royal. Both can survive in temperate climates if they are planted in a sheltered area.

Sunlight: Full sun to part shade

Soil: Well-drained soil

Water: Medium

Temperature: 60 to 70 degrees F

Fertilizer: Apply any organic fertilizer

Caring for Parijat

Every leaf has a growth bud, so removing old flower blossoms encourages the plant to make more flowers instead of using the energy to make seeds. Clean away from around the base of the rosebushes any trimmed debris that can harbor disease and insects.

Typical uses of Parijat

Special features: Where winter hardy, orange jessamine is often grown as a hedge or screen. Interesting in containers or planters. For areas north of USDA Zone 10, plants must be overwintered indoors.

Ornamental use: The plant is used for ornamental purpose.
