Description

Description for Passiflora Sherry (Red)

The passiflora known more commonly as the passion flower vine is one of the new vines introduced for spring color offerings available at garden centers.

If you are ready to add a conversation plant or something really unique to the outside patio, take a look at this Brazilian native. The passion flowers have a unique structure, which in most cases requires a large bee to effectively pollinate. This plant needs to be protected during winter.

Common name	Flower colours	Bloom time	Height	Difficulty
Krushan kamal,krishna kamal,	The plant carry red and white color	This plant growing winter and spring season	plant them in a container with a diametre of 16 -18 cm and repot in approx	Easy

Planting and care

This plant is suitable for growing indoors

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun or light shade	Requires consistently moist soil	Water as needed during the growing season if Mother Nature fails to provide.	-	Because passionflower vines are heavy feeders, they benefit from regular

Passion flower vines require an average amount of water, about 1 to 1.5" per week

application of a balanced, general-purpose fertilizer with similar proportions of nitrogen, phosphorus and potassium.

Caring for Passiflora Sherry

Water red passionflower vines deeply once or twice a week, saturating the soil to the root level. Prune dead or diseased vines back to the main vine in the spring before new growth resumes. Trim to maintain overall shape and size by removing overgrown vines.

Typical uses of Passiflora Sherry
