Passiflora Vitifolia Plant

## Description for *Passiflora Vitifolia*

**Plant height:** 3 - 6 inches

**Plant spread:**

*Passiflora vitifolia* is a vine with cylindric stems covered in red-brown hairs when young. The name is derived from the shape of leaves resembling that of grape leaves. The flowers are a beautiful deep red. Leaves are five-lobed and flowers are slightly smaller, but with the same stunningly beautiful flower and edible fruit

**Common name(s):** Perfumed Passion Flower, Grape Leaved Passion Fruit

**Flower colours:** Red

**Bloom time:** Spring and summer through fall

**Max reachable height:** 5 m

**Difficulty to grow:** Easy

## Planting and care

**Sunlight:** Full sun but will tolerate light shade for a short portion of the day.

**Soil:** Well-drained soil.

**Water:** Average Water

**Temperature:** The vine is moderately hardy and can be killed back by hard freezing temperatures or prolonged frosts.

**Fertilizer:** Time release fertilizer granules in early spring and again in summer.

## Caring for *Passiflora Vitifolia*

Prune out inner growth periodically to keep plant open and healthy.

## Typical uses of *Passiflora Vitifolia*

**Special features:**

**Ornamental use:** Used as a ground cover, on trellises or other supports for the lovely flowers and abundance of butterflies and hummingbirds they attract. Wonderful over a trellis as a shade-providing option or as a slope stabilizer, tropical selections can be grown as houseplants in a very bright window.
