### Description

The beautiful and graceful peltophorum tree is often called "Yellow Poinciana" because it looks just like a royal poinciana but with very showy yellow blossoms.

These trees work best on a large property or as a single specimen tree in a medium-sized yard. The breathtaking, frothy flowers appear in late summer on a treetop full of soft, fern-like leaves.

**Common name:** Copperpod, Golden Flamboyant, Yellow Flamboyant, Yellow Flame Tree, Yellow Poinciana, Konda chinta or Pachha sunkesula in Telugu, Perunkonrai in Tamil, Radhachura in Bangla

**Color:** Yellow, Gold

**Height:** Height : 30 -75 / 9.1m - 22.9m

**Width :** 40 -70 / 12.2m - 21.3m

**Difficulty level:** Easy

### Planting & Care

**Sunlight:** Full sun

**Soil:** well-drained soil.

**Water:** Drought Tolerant, Average Water

**Fertilizer:** Fertilize 3 times a year - once each in spring, summer and fall - with a quality granular fertilizer.

### Care:

- Trimming isn t necessary other than to prune branch ends after flowering is done in order to promote more bushy growth.
- Also you can remove any too-low branches as the plant matures.
- The seed pods will fall off on their own, and aren t a nuisance.

Use
