Description

Description for Phoenix Canariensis

Phoenix canariensis is the hardy palm and most popular palm species. It has a husk-like stem consisting of wide, dark green leaf bases partly covered with brown, small fibrous hair. The dark green fronds are finely divided and their stalks are a paler green color. The large fronds grow upwards direction from a single crown of palm.

Common name(s): Canary Island Date Palm, Pineapple Palm, Canary Date Palm, Slender Date Palm

Flower colours: Not defined

Bloom time: Not defined
