[Ask a question about this product](#)

Description Easily grown in average, acidic, medium moisture, well-drained soils in full sun. Tolerates some light shade

**Common name:** Colorado spruce

**Color:** Green

**Bloom time:** Non-flowering

**Height:** 3.00 to 5.00 feet

**Difficulty level:** easy to grow

**Planting & Care**

Prefers rich, moist soils. Although established plants have some drought tolerance, soils should be kept consistently moist and not allowed to dry out in the early years. Prune out upright shoots to maintain globose form. Generally prefers cool climates and will struggle in the heat and humidity

**Sunlight:** Full sun

**Soil:** well-drained soil

**Water:** Medium

**Temperature:** 75°-80°

**Fertilizer:** Apply any organic fertilizer

**Care:**

- Light: Bright, indirect light.
- Do not expose to direct summer sun.
- Water: The pilea group likes high humidity and has fairly high water requirements.
- Don't let the soil dry out between waterings in the summer—instead water when the soil is damp.
- Cut back on water in winter.
-

**Special Feature:**

Blue-needed specimen shrub for the landscape. Rock garden. Shrub border. Hedge.

Use

**Ornamental use:**

- The plant is used for ornamental purpose

**Note:**

No serious insect or disease problems.
