Description

Description for Pine Tree

Pandanus odorifer is an aromatic monocot species of plant in the Pandanaceae family, native to Polynesia, Australia, South Asia, and the Philippines, and is also found wild in southern India and Burma. It is commonly known as screw-pine.

Common name	Flower colours	Bloom time	Height	Difficulty
Pandanus odorifer	White	Seasonal bloomer	1.5 to 2 feet	Easy to grow

Planting and care

The deep planting encourages the developing stem to send out roots to help stabilize the plant and perhaps eliminate the need for staking. Also, deep planting keeps Bangada bulbs cool when temperatures soar. Enrich the soil with leaf mold or well-rotted organic matter to encourage good drainage.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	Well-drained soil	Medium	30 to 40 degrees C	Apply any organic fertilizer

Caring for Pine Tree

- Pine trees have many large lateral branches and root systems are usually shallow.
- Using a pine tree fertilizer in addition to regular watering and pruning helps keep trees healthy and better able to tolerate stress, insects

and pine tree diseases.

- Newly planted pine trees benefit from ArborKelp, SavATree's exclusive seaweed biostimulant fertilizer which aids in tree establishment, promotes root growth and heightens stress tolerance.
- Mature and established pine trees benefit from fertilizer feedings of organic-based macro and micronutrients for the nutrition necessary to sustain their health.

Typical uses of Pine Tree

Special features: Interesting fruit tree or ornamental for tropical to subtropical areas. Container plant for cooler climates.

Ornamental use: The plant is used for ornamental purpose. Its generally kep indoor in living room and in terrac area.
