Description

Description for Piper nigrum, Kali Mirch

Common name	Flower colours	Bloom time	Height	Difficulty
Common pepper	Yellowish-green	Seasonal bloomer	10 to 15 feet	Easy to grow

Planting and care

Plant care may require a bit of effort, but the results are well worth the work. Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance. Common is a vine and has larger glossy green leaves than Royal. Both can survive in temperate climates if they are planted in a sheltered area.

Sunlight	Soil	Water	Temperature	Fertilizer
Part shade	Well-drained soil	Medium	60 degrees C	-

Caring for Piper nigrum

Plant care is not difficult but does require vigilance. The vines need to be trained early when they are young. You may use plant ties or just weave them through trellis sections. Fertilize the plant in spring just before new growth appears. Pinch off the tips of the vines in the second year to promote branching which will fill the trellis with bushy growth.

Typical uses of Piper nigrum

Special features: Commercially grown in tropical areas for pepper, Containers, Hanging baskets when plants are young.

Ornamental use: The plant is used for ornamental purpose. Its generally keep indoor in living room and in terrace area.
