Description

### Description for Pleomele, Song of India (Golden)

Easily grown in consistently moist to wet soils in full sun. Tolerates light shade, but performs best in full sun. Tolerates heavy soils. Needs ample moisture, but also does surprisingly well in slightly moist soils that do not dry out.

Common name Reflexed Dracaena, pleomele or song of India	Flower colours Green	Bloom time Winter	Height Up to 6 to 15 feet (1.8 to 4.6 m) tall	Difficulty Easy to grow
--	-------------------------	----------------------	---	----------------------------

## Planting and care

Plant care may require a bit of effort, but the results are well worth the work. Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance. Common is a vine and has larger glossy green leaves than Royal. Both can survive in temperate climates if they are planted in a sheltered area.

Sunlight Bright indirect sunlight	Soil Well-drained soil	Water Keep soil lightly moist spring through fall, slightly drier in winter. Do not let the soil get waterlogged.	Temperature 18 to 24 degrees C	Fertilizer Apply any organic fertilizer
--------------------------------------	---------------------------	--	-----------------------------------	--

## Caring for Pleomele

- Fertilize the plant in spring just before new growth appears.
- Pinch off the tips of the vines in the second year to promote branching which will fill the trellis with bushy growth.
- The vining plant is prone to spider mites, which can be combated with horticultural oil or neem oil.

## Typical uses of Pleomele

**Special features:** All dracaenas can be used to help clean the air of harmful toxins.

**Culinary use:** NA

**Ornamental use:** The plant is used for an ornamental purpose. It is generally keep indoor in the living room and in terrace area.

**Medicinal use:** NA
