Description

### Description for Pomegranate, Annar, Anar (Grafted)

The pomegranate, botanical name *Punica granatum*, is a fruit-bearing deciduous shrub or small tree in the family Lythraceae that grows between 5 and 8 m tall.

Whether you train it as a tree or leave it as a shrub, grow these in your home garden to add a stunning splash of color. Pomegranates thrive in areas of warm, arid conditions.

Common name	Flower colours	Bloom time	Height	Difficulty
<i>Punica granatum</i> ,Pomegranate, Annar ,dalimb	orange-red	June to September	2 ft to 10 ft	easy to grow

### Planting and care

Heat should be second on your pomegranate seed care list. These seeds will germinate at normal room temperature in about 30-40 days. Bring the soil temperature up a few degrees and you can cut this time in half. Try surrounding your plant with foil and placing it in direct sun until the seedlings sprout.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	well-drained soil	Dry to medium	40 to 50 degrees F	Apply any organic fertilizer

### Caring for Pomegranate

- Pomegranates need full sun. Keep an eye on the weather report and if temps threaten to drop below 40 degrees F. (4 C.), move the plant indoors to a sunny window.
- Water the tree deeply about once a week, possibly more often during peak summer months.
- Fertilize the tree with half cup of 10-10-10.

## Typical uses of Pomegranate

**Special features:** Cottage gardens, wild gardens, meadows, prairies and naturalized areas. Good fresh cut or dried flower.

**Culinary use:** used as edible fruit, juice and many more...

**Ornamental use:** The plant is used for ornamental purpose. Its generally kept indoor in living room and in terrac area.

**Medicinal use:** na
