Description

Description for Portulaca Oleracea, 10 O Clock (Yellow)

P. oleracea is mostly annual, but it may be perennial in the tropics. Stems are purplish-red to green, forming mats. The leaves are fleshy. Flowers come in a group at the end of the stem. There are notched 4/5/6 petals.

Common name Red root, Common purslane, Verdolaga, Little hogweed, Pursley	Flower colours Yellow	Bloom time Summer to frost	Height Up to 1 foot	Difficulty Easy to grow
--	--------------------------	-------------------------------	------------------------	----------------------------

Planting and care

Set out at last frost date. This plant is ideal for hot, humid climates and rocky, difficult areas of the garden. It spreads branches so while planting 2 plants, keep the distance between them is about half feet.

Sunlight Full sun	Soil Poor to average, dry to moderately moist, well-drained soils	Water Medium	Temperature 10 to 38 degrees C	Fertilizer Use any organic fertilizer.
----------------------	--	-----------------	-----------------------------------	---

Caring for Portulaca Oleracea

- Look for aphids, gnats, snails or slugs and apply cure on time.
- Avoid moist soils.

- Control the purslane by cutting the flowers off before the plants set seed.

Harvesting

Harvest whole plants by pulling them from the soil during spring.

Typical uses of Portulaca Oleracea

Special features: Edible, Groundcover, Flowers

Culinary use: The stems, leaves and flower buds are all edible. Purslane may be used fresh as a salad, stir-fried, or cooked as spinach.

Ornamental use: It is good for edging or ground cover for beds, rock gardens or along walks; containers or hanging baskets.

Medicinal use: It is used in Chinese traditional medicines.
