Description

Description for Prosopis Cineraria, Shami, Sami

Prosopis cineraria is a species of flowering tree in the pea family, Fabaceae. Leaves are double compound. The leaflets are dark green and have a tiny point. The tree is evergreen or nearly so. It produces new flush leaves before summer. The flowers are small in size and yellow or creamy white in color, appear from March to May after the new flush of leaves. The pods are formed soon thereafter and grow rapidly in size attaining full size in about two months time.

Common name	Flower colours	Bloom time	Height	Difficulty
