Description

Description for Annona Reticulata, Ram phal (Grafted)

Annona reticulata is a small deciduous or semi-evergreen tree in the plant family Annonaceae. It is best known for its fruit, called custard apple, a common name it shares with fruits of several other species in the same genus: *A. cherimola* and *A. squamosa* or sometimes it is called wild-sweetsop, bull's heart, bullock's heart, or ox-heart.

Common name	Flower colours	Bloom time	Height	Difficulty
Custard Apple, sitaphal	Yellowish-green	June	20 to 35 feet	Easy to grow

Planting and care

soil is treated with ground sulfur. Before you plant, be sure that you choose varieties proven in your climate. When in doubt, All-America Rose Selections winners are good bets. Or check with your local nursery. If you order plants from a mail-order company, order early, in January or February.

Sunlight	Soil	Water	Temperature	Fertilizer
Medium	Well-drained soil	Medium	25 degrees C (77 to 41 degrees C)	Apply any organic fertilizer

Caring for Annona Reticulata

Always wear safety goggles; branches can whip back when released. Start with pruning shears for smaller growth. Use loppers, which look like giant, long-handle shears, for growth that is more than half an inch thick

Typical uses of Annona Reticulata

Special features: Ornamental, Fruit production.

Ornamental use: The plant is used for ornamental purpose.
