Description

Description for Rhapsis Palm, Lady Palm

Although most fan palms are house plants and will mostly be found in large interior scape because of their size and spread, the Rhapsis Palm is well suited to life in the home. It has more of an upright growth habit than many other fan palms. Rhapsis are some of the easiest palms to grow, but each species has its own particular environment and culture requirements. Both 6 and 8 inch pots can be used as table top and accent plants, while 10 inch and up are free standing specimens.

Common name	Flower colours	Bloom time	Height	Difficulty
Rhapsis Palm, Lady Palm, Lady palm, Rhapsis Exelsa, Broadleaf Lady Palm, Needle leaf Palm,	-	-	4 m	Easy to grow

Planting and care

Sunlight	Soil	Water	Temperature	Fertilizer
Dappled light is best during the summer. In winter, it can tolerate light shade.	Rhapis will grow in almost any well-drained soil, but prefer a soil mixture. Soil density should be firm and allow water to slowly filter through. All roots and the base of canes should be covered to retain moisture. Use pebbles or sand to increase drainage	Water liberally during the summer, ensuring perfect drainage. In winter, reduce watering to once a month or every other week, depending on the temperature.	Plant works best between -5Å,Å°C to 38Å,Å°C.	For fertilizer dosage, leaf colour is one of your best guides: Rich green indicates fertilizer levels are adequate. Slight overall yellowish colour may mean the to apply nutrients.

Caring for Raphis Palm

Lady Palm, is a great indoor house plant. The fan-like fronds are a shiny, Remove lower leaves as they yellow and trim brown tips to the natural leaf shape using clean, sharp scissors. Reducing the light intensity will cause it to eventually drop some inner and lower fronds. Keep these removed as they occur. Keep your palm s foliage clean and initially keep an eye out for insect problems. Mealy bug, thrips, scale and sometimes even aphids can be a problem but a good wash down with soapy water should control these pests

Typical uses of Raphis Palm

Special features:

Ornamental use: Rhapis excelsa adapts to most tropical and subtropical landscapes. R. subtilis thrives in warm, humid regional landscapes. R. humilis prefers subtropical landscapes with cool summer nights.
