Description

Description of Rapid growing Zephyranthes

Kids can get gardening experience with these easy and fast-growing Zephyranthes bulb. Zephyranthes is a perennials evergreen bulbous flowering plant. Bloom a gorgeous flower with attractive color and shape.

Steps to plant Zephyranthes bulbs in pots

1. Fill the provided pot with soil leaving 1-2 inch space below the pot rim.
2. Plant the bulbs 1/2 - 1 inch deep with pointed end facing up. Leave 2 - 3 inch space between bulbs while planting.
3. Water the bulbs generously but do not create water logged conditions. The water should drain freely from pot
4. Choose a place that receives direct sunlight in morning and partial shade during hot afternoon hours.
4. With proper care bulbs will sprout in 2-3 weeks
5. Zephyranthes bulbs may take 90 - 95 days to bloom from planting under favourable care and growing conditions.
