Description

Panama rose is a member of the Rondeletia family. Its botanical name is Rondeletia odorata. The scientific name epithet odorata means fragrant.

Common name: Panama Rose.

Color: Reddish orange

Bloom time: From summer to fall.

Height: 6 to 10 feet.

Difficulty level: Easy.

Planting & Care

Sunlight: Full Sun.

Soil: slightly acid

Water: Moist soil.

Temperature: above 4.5 °C (40 °F).

Fertilizer: Apply general garden fertilizer.

Care:

- If it drops lots of leaves during winter, that is generally a sign of root problems.
- Grow Rondeletia leucophylla in a large, clay pot instead of in the ground if it develops those problems.
- Cut back a Rondeletia leucophylla by two-thirds in late spring after it finishes blooming.
- Don't prune Rondeletia leucophylla after midsummer because that is when it begins making buds for winter.
-

Use
