**Opening Diameter :** Approx. 2.5 Inches

**Common name(s):** Round flask colorful terrarium

**Flower colours:** NA

**Bloom time:** NA

**Max reachable height:** Up to 10 cm (Plant)

**Difficulty to grow:** Easy to grow

## Planting and care

You should use water-soluble organic fertilizer in little quantity. Don't apply in large quantity; it will promote more vegetative growth. We

maintain the small plant size in the terrarium. That's the way we should control the vegetative growth.

If there is a need of re-potting then the potting media should be as follows a one and a half inch to two-inch layer in the bottom of the container. The soil should be porous to allow good drainage. It should be slightly moist for planting. Equal parts of garden soil, sand, and peat moss(1:1:1).

**Sunlight:** Bright area with indirect sunlight

**Soil:** Soil, sand, and peat moss (1:1:1)

**Water:** Sparingly

**Temperature:** 20 to 25 degree C

**Fertilizer:** Liquid fertilizer

### Caring for Round flask colorful terrarium

- Prune the tips of the nerve plant to create a bushier plant.
- Spray the water once in the fortnight with spraying bottle on the soil.
- Avoid spraying on the plant.
- This terrarium container don't have the drainage hole or holes, avoid application of large quantity water.
- Give it bright with indirect sunlight or near artificial light sources.
- The soil should not be saturated or soggy as this condition will lead to rotting.
- The glass walls should allow the light to reach the plants and it should be clean from dust, drafts, and temperature changes.
- If there is too much moisture on the inner side of the container that you cannot see your plants, then open the lid for temporarily to allow it to dry.
- Avoid too much direct sunlight to the container; it may burn the plants and the glass container may get very warm.
