Description

Description for Rudraksh

Rudraksha tree bear leaves which look similar to leaves of mango tree. The leaves are as usual green in color. Rudraksha leaves also fall and new leaves re-grow as happens usually with every tree. The leaves are found to be having well anti bacterial property.

So these leaves are used for treating wounds. Very particularly the leaves are used for treating headache, mental disorders, epilepsy, and migraine.

Rudraksha flowers are found with length nearly 15 cm. These grow in bunches. These are white in color. During nov-dev the flower bunches come on rudraksha tree. During jan-feb rudraksha fruits come on tree.

Common name Elaeocarpus ganitrus,Rudraksh	Flower colours White	Bloom time October to December	Height 2.5.00 to 30.00 feet	Difficulty Easy to grow
---	-------------------------	-----------------------------------	--------------------------------	----------------------------

Planting and care

The vining varieties require a support structure as some can get 15 feet tall. All plants prefer sun to light shade sites with well-draining and moderately fertile soil. Install the plant in the ground at the same level it was growing in the nursery pot. Most plants are grafted onto the common rootstock because of its superior hardiness.

Sunlight Full sun to part shade	Soil Well-drained soil	Water Keep soil moist throughout the growing season	Temperature 1 or 2 degrees c	Fertilizer Apply any organic fertilizer

Caring for Rudraksh

- Deadhead religiously and keep beds clean. Every leaf has a growth bud, so removing old flower blossoms encourages the plant to make more flowers instead of using the energy to make seeds.
- Clean away from around the base of the rosebushes any trimmed debris that can harbor disease and insects.

Typical uses of Rudraksh

Special features:

Ornamental use: The plant is used for ornamental purpose.
