Description

Description for Sage, Sefakuss

Sage is a hardy perennial with soft, grayish green leaves. Its flower colors vary; they can be purple, pink, blue, or white. Common sage is used most commonly for cooking; it's a classic in stuffing. Easily grown in average, dry to medium, well-drained soils in full sun. Sharp soil drainage is especially important. Avoid wet, poorly drained soils. Plants have good drought tolerance

Common name	Flower colours	Bloom time	Height	Difficulty
Perovskia atriplicifolia	Greenish white	July to October	1.5 to 2 feet	Easy to grow

Planting and care

Sage can grow from seeds, but the best way to grow high-quality sage is from cuttings from an established plant. You can start the seeds/cuttings indoors 6 to 10 weeks before the last spring frost. Plant the seeds/cuttings in well-drained soil 1 to 2 weeks before the last spring frost. Plant the seeds/cuttings 24 to 30 inches apart. For best growth, the soil should be between 60° and 70°F. Plants should grow to be between 12 and 30 inches in height. In the garden, plant near rosemary, cabbage, and carrots, but keep sage away from cucumbers.

Sunlight
Full sun

Soil
Well drained soil

Water
Medium

Temperature
20 to 25 degrees C

Fertilizer
Apply any organic fertilizer

Caring for Sage

- Be sure to water the young plants regularly until they are fully grown so that they don't dry out.
- Prune the heavier, woody stems every spring.
- It's best to replace the plants every 4 to 5 years to ensure the best quality.

Harvesting

During the first year, harvest lightly to ensure that the plant grows fully.

After the first year, be sure to leave a few stalks so that the plant can rejuvenate.

If fully established, one plant can be harvested up to three times in one season.

Sage's flavor is best when fresh, but it can be stored frozen or dried.

To dry, leave the branches in the sun; once dried, remove the leaves and store them in an airtight container.

Typical uses of Sage

Special features:

Ornamental use: The plant is used for ornamental purpose.
