Description

Description for Snake Plant, Sansevieria trifasciata, Sansevieria zeylanica

Sansevieria trifasciata is a species of flowering plant in the family Asparagaceae. Leaves are erect, fleshy, sharply-pointed, sword-shaped, deep green with light gray-green horizontal stripes. Leaves arise in a rosette from a thick rhizome. Small fragrant greenish-white flowers bloom on mature plants. Flowers and fruit rarely appear on indoor plants.

Common name	Flower colours	Bloom time	Height	Difficulty
Snake plant, mother-in-law tongue, tongue of a devil	Greenish-white	Spring, Summer	Up to 4 feet	Easy to grow

Planting and care

Sansevieria Plants enjoy being root-bound in small pots. The best way to propagate Sansevieria Plants is by plant division or leaf cuttings. Re-pot when it gets the optimum height as the roots will need space to spread.

Sunlight	Soil	Water	Temperature	Fertilizer
Bright light, they can adapt to full sun.	Free draining soil, sandy soil	Medium	Grow well in temperatures between 60 and 85 degrees F.	Feed a mild cactus fertilizer during the growing season; do not fertilizer in the winter.
