Description

Description for Sedeveria Pink

Good tolerance for drought and heat. Best grown in a sheltered location in the St. Louis area where plants may not be reliably winter hardy. Protect in winter. Plants spread along the ground sometimes rooting as they go to form an attractive ground cover.

Common name	Flower colours	Bloom time	Height	Difficulty
Succulent Plug, Sedeveria Pink, Succulents Sedeveria, Succulent Plants, Pink Granite, Hardy Succulents, Cacti	Pink	June to September	0.25 to 0.50 feet	Easy to grow

Planting and care

The deep planting encourages the developing stem to send out roots to help stabilize the plant and perhaps eliminate the need for staking. Also, deep planting keeps Bangada bulbs cool when temperatures soar. Enrich the soil with leaf mold or well-rotted organic matter to encourage good drainage.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	Well-drained soil	Dry to medium	20-30 degrees C	Apply any organic fertilizer

Caring for Sedeveria Pink

- The mulch should feel moist but not wet.
- Apply a high-potassium liquid fertilizer every 2 weeks from early spring until 6 weeks after flowering.

- Keep moist in winter.
- Apply a thin layer of compost each spring, followed by a 2-inch layer of mulch.

Typical uses of *Sedeveria Pink*

Special features: Ground cover or edger. Grows well in hot, dry locations. Also effective in containers.

Ornamental use: The plant is used for ornamental purpose.
