Description

Description for Share Memories with Aralia

Common name	Flower colours	Bloom time	Height	Difficulty
Spikenard	-	-	75to90 cm 29to35 inches	Easy to grow

Planting and care

False aralia is native to New Caledonia. The lower foliage bear a strong resemblance to marijuana, but the plants are not related. Although you can grow them outdoors in USDA plant hardiness zones 10 and 11, they are grown as houseplants in most parts of the country. You can also grow them in outdoor pots, but they are difficult to acclimate to indoor conditions after spending a summer outdoors.

Sunlight	Soil	Water	Temperature	Fertilizer
Its a indoor plant.	Well-drained soil	Medium	65 to 75 degrees C	Apply any organic fertilizer

Caring for Share Memories with Aralia

Place the false aralia houseplant near a sunny window where it will receive bright to moderate light, but where the sun's rays never fall directly on the plant. Direct sun can cause the leaf tips and edges to turn brown.

Typical uses of Share Memories with Aralia

Special features:

Ornamental use: The plant is used for ornamental purpose.
