Description Sida cordifolia is a perennial subshrub of the mallow family Malvaceae native to India. It has naturalized throughout the world, and is considered an invasive weed in Africa, Australia, the southern.

Common name: bala, Country mallow

Color: red

Bloom time: July to September

Height: 3.00 to 4.00 feet 3.00 to 4.00 feet

Difficulty level: easy to grow

Planting & Care

plant care may require a bit of effort, but the results are well worth the work. Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance. Common is a vine and has larger glossy green leaves than Royal. Both can survive in temperate climates if they are planted in a sheltered area.

Sunlight: Full sun

Soil: well-drained soil

Water: Medium to wet

Temperature: 25F

Fertilizer: Apply any organic fertilizer

Care:

- After a good rain, find a spot that is the first to dry out.
- Water trapped beneath the scales may rot the bulb, so a well-drained site is essential.
- Also, select a site that gets full sun.
- For dependable blooms, plants need six to eight hours of direct sunlight a day.
-

Harvesting: 7 days

Care:

- Clean away from around the base of the rosebushes any trimmed debris that can harbor disease and insects.
- Late in the season, stop deadheading rugosas so that hips will form on the plants; these can be harvested and dried on screens, away from sunlight, then stored in an airtight container.
-

Special Feature:

Borders. Specimen, group or mass for landscape accent. Temporary hedge. Useful in low spots or wet areas in the landscape. Effective along streams or ponds.

Use

Note:

for medicinal use

Reference:

No serious insect or disease problems. Some susceptibility to leaf spots, blights, rusts and canker. Japanese beetles, sawflies, whiteflies and aphids are occasional insect visitors.
