Spherical desert plant terrarium is a collection of small Succulent growing in a container. A small indoor garden in a glass container is easy to make. This terrarium contains round shape container with succulent plants, pebbles, toy, and potting medium, etc. It looking appearance as like the miniature scenes of the garden.

Pot Height : Approx. 5.5 Inches

Opening Diameter : Approx. 4 Inches

Common name(s): Spherical desert plant terrarium, Succulent Terrarium

Flower colours: NA

Bloom time: NA

Max reachable height: Up to 10 cm (Plant)

Difficulty to grow: Easy to grow

Planting and care

You should use water-soluble organic fertilizer in little quantity. Don't apply in large quantity; it will promote more vegetative growth. We maintain the small plant size in the terrarium. That's the way we should control the vegetative growth.

If there is a need of re-potting then the potting media should be as follows a one and a half inch to two-inch layer in the bottom of the container. The soil should be 3 parts of potting soil, 1 part of grit (pumice), 1 part of the horticultural-grade sand, 1/2 part of the compost etc.

Sunlight: Bright area with indirect sunlight

Soil: Pumice, horticultural-grade sand, compost(2:2:1)

Water: Sparingly

Temperature: 20 to 25 degree C

Fertilizer: Liquid fertilizer

Caring for Spherical desert plant terrarium

- Spray the water once in the fortnight with spraying bottle on the soil.
- Avoid spraying on the plant.
- This terrarium container don't have the drainage hole or holes, avoid application of large quantity water.
- Give it bright with indirect sunlight or near artificial light sources.
- The soil should not be saturated or soggy as this condition will lead to rotting.
- The glass walls should allow the light to reach the plants and it should be clean from dust, drafts, and temperature changes.
- If there is too much moisture on the inner side of the container that you cannot see your plants, then open the lid for temporarily to allow it to dry.
- Avoid too much direct sunlight to the container; it may burn the plants and the glass container may get very warm.

Typical uses of Spherical desert plant terrarium

Special features: Well arranged, settled-up terrarium

Ornamental use: It is used for the ornamental purpose.

Pot seems to be really small. DO I have to shift the plan to the bigger pot as it starts growing in a few months?
