Planting and care

It is easily grown is a house plant in warm, humidified areas. Prefers bright indirect light. Protect from direct sun. May be grown on a moss pole or in a hanging basket. Best grown in a soil based potting mix.

Water regularly during the growing season, but reduce watering from fall to late winter. Likes high humidity, so consider sitting plant in a humidified room or place pot on a tray of wet pebbles.

Sunlight	Soil	Water	Temperature	Fertilizer
Bright, filtered light or Part shade.	Any good potting mix. Use a container with good drainage.	Keep the potting mix moist in summer, allowing the surface to dry out before watering again. Water less often in winter, letting the top half of the potting mix dry out.	Normal room temperatures. 60-75 degrees F/16-24 degrees C.	Feed every 2 weeks from spring through fall with a balanced house plant fertilizer diluted to half the normal strength. In winter, feed monthly.

Caring for Syngonium

- Arrowhead plant care requires humid conditions, especially during dry winter months.
- Mist the plant daily or place its container on a tray filled with pebbles and water to increase humidity for optimal growth.
- Keep them away from direct sunlight, as this will cause the arrowhead plant to burn or bleach.
- The arrowhead plant root structure is quite extensive, spreading and growing to the point of becoming invasive in the wild.
- Even within a contained environment, because of arrowhead plant root structure, the plant should be repotted every second spring.

Typical uses of Syngonium

Special features: As a house plant, it is typically grown for its attractive ornamental foliage which changes shape as the leaves mature. Juvenile leaves (to 5.5 inch long) are ovate with heart-shaped bases and sometimes with silver variegation.
