Description

## Description for Syzygium Cumini, Jamun

Common name jambul, jambolan, jamblang or jamun,	Flower colours red	Bloom time early summer	Height 30 m	Difficulty easy to grow
--	-----------------------	----------------------------	----------------	----------------------------

## Planting and care

The deep planting encourages the developing stem to send out roots to help stabilize the plant and perhaps eliminate the need for staking. Also, deep planting keeps lily bulbs cool when temperatures soar.

Sunlight Partial Shade	Soil well-drained soil	Water Medium	Temperature 20 to 40 degrees C	Fertilizer Apply any organic fertilizer
---------------------------	---------------------------	-----------------	-----------------------------------	--

## Caring for Syzygium Cumini

Apply a high-potassium liquid fertilizer every 2 weeks from early spring until 6 weeks after flowering. Keep moist in winter.

## Typical uses of Syzygium Cumini

**Special features:** Food (Herb & Spice: In Thailand, Vietnam, Laos and India, the leaves are used fresh as a culinary herb which has a similar, but stronger flavor than Coriander (*Coriandrum sativum*). The leaves are used to season meat and other foods in Caribbean, Latin American and Asian cuisines.

**Culinary use:** na

**Ornamental use:** The plant is used for ornamental purpose
