Description

Description for Tabebuia Avellanedae, Pink Trumpet

The plant possesses broad leaves. It has large pink flowers which are used in landscaping and decoration.

Common name	Flower colours	Bloom time	Height	Difficulty
Pink Tabebuia, Deep Pink Tahebuia, Gulabi Tabubia	Pink, Dark Pink	November, December	More than 12 meters	Easy

Planting and care

Do not plant in water logged areas.

Tall - 2 to 3 meter plants that are 3 to 4 year old are available in many plant nurseries today. Planting these helps as plants start flowering in the 2nd year itself.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	Loamy soil, Sandy soil	Low	27 to 40 degrees C	Use any organic fertilizer

Caring for Tabebuia Avellanedae

- Plants are rather slow growing. They will flower 3 to 6 years after planting.
- Grown on roadside, private gardens and parks and other locations for its beauty and shade.
- Plants like well drained soils. Regular watering in hot dry months will help it grow well.

Typical uses of Tabebuia Avellanedae

Special features: This tree is in full bloom - when very few other trees have flowers - ie at the onset of winter.

Ornamental use: Used in landscaping and decoration.
