Description Tabebuia rosea, also called pink poui, and rosy trumpet tree is a neotropical tree that grows up to 30 m and can reach a diameter at breast height of up to 100 cm.

**Common name:** tabebuia

**Color:** pink

**Bloom time:** Seasonal bloomer

**Height:** 60.00 to 90.00 feet

**Difficulty level:** easy to grow

**Planting & Care**

After a good rain, find a spot that is the first to dry out. Water trapped beneath the scales may rot the bulb, so a well-drained site is essential. Also, select a site that gets full sun. For dependable blooms, plants need six to eight hours of direct sunlight a day.

**Sunlight:** Full sun

**Soil:** well-drained soil

**Water:** Medium

**Temperature:** 20 °C to 30 °C

**Fertilizer:** Apply any organic fertilizer

**Care:**

- plant care may require a bit of effort, but the results are well worth the work.
- Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance.

- Common is a vine and has larger glossy green leaves than Royal.
- Both can survive in temperate climates if they are planted in a sheltered area.
- 

**Care:**

- Clean away from around the base of the rosebushes any trimmed debris that can harbor disease and insects.
- Late in the season, stop deadheading rugosas so that hips will form on the plants; these can be harvested and dried on screens, away from sunlight, then stored in an airtight container.
- 

**Special Feature:**

Where winter hardy, this flowering tree is commonly planted as a lawn specimen. Also useful as a shade tree of street tree.

Use

**Medicinal use:**

- A decoction of the flowers, leaves and roots has been used to reduce fevers and pain, cause sweating, to treat tonsil inflammation and various other disorders.
- Among the various active phytochemicals in the tree is lapachol, a natural organic compound isolated from various other *Tabebuia* species.

**Note:**

for medicinal use
