Description Tabebuia rosea, also called pink poui, and rosy trumpet tree is a neotropical tree that grows up to 30 m and can reach a diameter at breast height of up to 100 cm.

Common name: tabebuia

Color: pink

Bloom time: Seasonal bloomer

Height: 60.00 to 90.00 feet

Difficulty level: easy to grow

Planting & Care

After a good rain, find a spot that is the first to dry out. Water trapped beneath the scales may rot the bulb, so a well-drained site is essential. Also, select a site that gets full sun. For dependable blooms, plants need six to eight hours of direct sunlight a day.

Sunlight: Full sun

Soil: well-drained soil

Water: Medium

Temperature: 20 °C to 30 °C

Fertilizer: Apply any organic fertilizer

Care:

- plant care may require a bit of effort, but the results are well worth the work.
- Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance.
- Common is a vine and has larger glossy green leaves than Royal.
- Both can survive in temperate climates if they are planted in a sheltered area.

-

Care:

- Clean away from around the base of the rosebushes any trimmed debris that can harbor disease and insects.
- Late in the season, stop deadheading rugosas so that hips will form on the plants; these can be harvested and dried on screens, away from sunlight, then stored in an airtight container.

-

Special Feature:

Where winter hardy, this flowering tree is commonly planted as a lawn specimen. Also useful as a shade tree of street tree.

Use

Medicinal use:

- A decoction of the flowers, leaves and roots has been used to reduce fevers and pain, cause sweating, to treat tonsil inflammation and various other disorders.
- Among the various active phytochemicals in the tree is lapachol, a natural organic compound isolated from various other *Tabebuia* species.

Note:

for medicinal use
