Description

Description for Tecoma (Shurb, Red)

Winter hardy to USDA Zones 9-11. In St. Louis, plants should be grown in the ground as annuals or in pots/containers that may be overwintered indoors. Plants need well-drained soils in full sun.

Common name	Flower colours	Bloom time	Height	Difficulty
yellow bells	Yellow	June to frost	3.00 to 5.00 feet	easy to grow

Planting and care

Tecoma capensis, commonly known as cape honeysuckle, is a flowering, versatile evergreen that is suitable as a climbing vine, border plant, shrub or ground cover. It blooms in clusters of tubular, red-orange flowers that are about 2 inches in length in the late summer, fall and winter.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	well-drained soil	Medium	28Å°F	Apply any organic fertilizer

Caring for Tecoma

- Train a climbing vine cape honeysuckle plant on a trellis or other supporting object using plant ties to support the vines. .
- To maintain the shape of shrubs, prune long or unruly branches back to a side branch or bud with sharp pruning shears.
