Description

Description for Tulip (Pink White)

This is single flowered and brightly colored perennial variety, with long lasting flowers on strong stems. Generally green colored foliage and whole plant spread up to 15 cm. After the tulips have bloomed, leaves fade and turn brown.

Common name	Flower colours	Bloom time	Height	Difficulty
Tulip	Pink-white	Spring	Up to 22 inches	Easy to grow

Planting and care

Tulips grow best in full sun in a light, well-drained soil enriched with organic matter. Set them upright at the bottom of the hole, tops up (pointed side up), and space properly. Rooting time is from twelve to sixteen weeks.

Press the bulbs into the soil and cover with the prepared soil. Plant 5 to 8 inches apart from center of bulb to center of another bulb and Plant 6 to 8 inches deep. Tulips show charm during their growth in a sunny location. The bulbs can be lifted, dried, cleaned and stored in a cool place until further planting time.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun, Partial Shade, full	Well drained/light/sandy,	Medium	14 to 27 degrees C	Use any organic fertilizer.

shade

rich soil

Apply once in a 15 days span in primary months then do it monthly.

Caring for Tulip

- Tulips should not be grown in the same soil for several years, so replace with new soil every other year.
- After planting water thoroughly to settle the soil and to encourage the rooting.
- Add 1 to 3 inches of mulch for winter protection after the ground freezes.
- Remove blooms as soon as they fade to prevent the formation of seeds.

Harvesting

NA

Typical uses of Tulip

Special features: It is usually fragrant flower again for several years after they were first planted, making them more reliable than other options.

Culinary use: NA
