Description When it comes to indoor plants, a variegated ivy plant can add some But care of a variegated ivy differs somewhat from the care of other kinds of ivy

**Common name:** English ivy

**Color:** Green

**Bloom time:** September to October

**Height:** 20.00 to 80.00 feet

**Difficulty level:** easy to grow

**Planting & Care**

Variegated ivy leaves are caused by a genetic factor in the ivy plant, but, without proper variegated ivy care, a variegated ivy plant can revert to the more standard green leaves.

One key factor is sunlight. While a variegated ivy plant can't take direct sunlight, they do need bright sunlight.

**Sunlight:** Part shade to full shade

**Soil:** well-drained soil

**Water:** Medium

**Temperature:** 35° (1°C)

**Fertilizer:** Apply any organic fertilizer

**Care:**

- Variegated ivy leaves will typically have green and white or yellow markings.
- The white and yellow areas on the variegated ivy leaves lack chlorophyll.
-

Chlorophyll serves many purposes, the main ones being producing food for the variegated ivy plant and protecting the plant from the rays of the sun.

- 

**Special Feature:**

Cover for fences, trellises or walls. Ground cover. Lawn alternative. Smaller-leaved cultivars are often used for topiary shapes, hanging baskets, houseplants or small area ground covers.

Use

**Medicinal use:**

- English ivy climbing up the side of a tree or building, but did you know this silent invader also has medicinal properties

**Culinary use:**

- Variegated English Ivy Leaves

**Note:**

for medicinal use, please consult appropriate doctor / physician before use
