Variegated Spider Lily Plant

01

5 inch Grower Round Plastic Pot (Black)

Description for Variegated Spider Lily

Plant height: 3 - 5 inches

Plant spread: 3 - 5 inches

Dense clumping plant. The leaves are strap-like and variegated. Flowers initially occur in clusters. Each cluster is at the base of a bract. White flowers that resemble those of the green-leafed Spider Lily. The inflorescences carry plantlets at the tips of their branches, which eventually droop and touch the soil, developing adventitious roots.

Common name(s): Variegated Spider Lily, spider plant, spider ivy, ribbon plant

Flower colours: White

Bloom time: Spring and summer

Max reachable height: Up to 24 inches

Difficulty to grow: Moderate to grow

Planting and care

Chlorophytum comosum has a widespread native distribution in Africa. They will tolerate temperatures down to 2 degrees C (35 degrees F), but grow best at temperatures between 18 degrees C (65 degrees F) and 32 degrees C (90 degrees F).

Sunlight: Full Sun to Shade

Soil: Moist

Water: -

Temperature: 18 to 32 degrees C

Fertilizer: Use any organic fertilizer.

Caring for Variegated Spider Lily

- Members of this family are not the easiest to look after, they should be fertilized about three times a year.
- The leaves and flowers should be cut off once they have died. If you live in a very cold area then the bulbs should be removed from the

garden in the autumn, and stored indoors in a cool place. It may take as long as five years before you see flowers from your Crinum lilies

Typical uses of Variegated Spider Lily

Special features:

Ornamental use: This plant is used for an ornamental purpose.
