Description

With this purchase you will get:

01

Victoria Bird Nest Fern, Asplenium Victoria Plant

01

5 inch Grower Round Plastic Pot (Black)

Description for Victoria Bird Nest Fern, Asplenium Victoria

Plant height: 5 - 9 inches

Plant spread: 4 - 8 inches

This unique fern grows in the form of a deep rosette of large, shiny, spear-shaped fronds. New fronds unfurl from the centre of the plant. The fronds are light green, often crinkled, with a black midrib, and exhibit circinate venation. Spores develop in sori on the underside of the fronds.

Common name(s): Victoria Bird Nest Fern, bird's nest fern

Flower colours: NA

Bloom time: NA

Max reachable height: Up to 150 cm

Difficulty to grow: Easy to grow

Planting and care

Asplenium can survive either as an epiphytal, or terrestrial plant, but typically grows on organic matter. A peat based potting mix is required. 2 parts peat and 1 part perlite (maybe a little less) is one mixture that will be fine. A peat based mixture with organic material is also good. The two main conditions to provide well is enough humidity and to protect the leaves from direct sunlight. It thrives in warm, humid areas in partial to full shade.

Sunlight: Full to partial shade

Soil: A peat based potting mix is required.

Water: Moderately

Temperature: 20 to 30 degrees C

Fertilizer: Use any organic fertilizer

Caring for Victoria Bird Nest Fern

- Fertilizer should only be given to the plant two to three times a year.
- Even then, the fertilizer should only be applied at half strength and should only be given during the spring and summer months.
- Too much fertilizer will cause deformed leaves with brown or yellow spots or edges.

Harvesting

NA

Typical uses of Victoria Bird Nest Fern

Special features: Interesting foliage

Culinary use: NA

Ornamental use: Used for decorations in homes, shops and offices.

Medicinal use: NA
