Caring for Yucca

- Caring for yucca plants is fairly simple.
- When older leaves die on a mature yucca plant, simply cut them away, usually in the spring.
- Caring for yuccas like this helps the rest of the plant look nicer, and allows the newer leaves to grow.
- When caring for yucca plants, it is a good idea to wear gloves to protect your hands from the sharp leaves.
- After the yucca has stopped flowering and the fruit has appeared, prune back the flower stalk. The stalk should be cut clear to the ground.
- When landscaping with yuccas, it is best to keep them away from sidewalks and other high traffic areas as the leaves are extremely sharp and can cut someone if they should brush up against the plant.
