Description

Description for Zephyranthes Jacala Red, Rain Lily Jacala Red

Leaves are a deep glossy green and measure 3 mm wide. Flowers, which at first resemble a new leaf, but emerge from their papery sheaves to a stunning whiteness; they are erect in perianth.

Common name	Flower colours	Bloom time	Height	Difficulty
Rain lily, Autumn zephyr lily, Peruvian swamp lily	Red	After fall	Up to 20 cm	Easy to grow

Planting and care

The plants may be grown outdoors year round in moist, organically rich, well-drained soils in full sun.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun to part shade	Medium wet loamy to sandy soil	Medium. Apply just enough moisture to keep the soils from totally drying out.	Minimum 10 degrees C and above	Use any organic fertilizer.

Caring for Zephyranthes Jacala Red

- Plant 10cm deep in any moderately fertile, moist but well-drained soil.
- Protect from winter wet.
- Generally disease and pest free.
- In fall before the first frost, dig dry and store bulbs for winter in a cool, frost-free location in a medium such as peat or vermiculite that is given minimal moisture.

Harvesting

NA
